

Fiberglass Enclosure For Refrigerated Samplers

TRACOM fiberglass Model 200-021 sampler enclosures offer a convenient solution to the protection of your older model refrigerated sampler. Made of fiberglass reinforced plastic (FRP), TRACOM enclosures are lightweight, corrosion resistant, structurally strong and built to meet harsh environmental conditions.

All Model 200-021 Sampler Enclosures Come With A Long List Of Standard Equipment, Including

All stainless steel hardware
 Front access door
 Top access door
 Continuous stainless steel piano hinges
 1" thick foam core (R~7) for harsh weather protection
 Pad lockable stainless steel hasps
 Molded-in color (for virtually no maintenance) with stain finish

Optional Equipment Available For The Model 200-021 Include

Integral floor
 Upgraded insulation (2" thick, R~14)
 Custom gel coat colors (to match your environment)
 Fixed and manually adjustable louvers
 120 CFM exhaust fan
 500 watt stainless steel heater
 Duplex breaker box (NEMA 3R with 2/20 amp breakers)
 GFCI outlet
